Professional Summary

Practical UX/UI Designer with over 6 years of experience working as the lead designer on user-centered platforms across smart infrastructure, healthcare, fintech, and logistics. Specializing in Object-Oriented UX (OOUX) and Lean UX, I bridge the gap between design and development by building clear, organized interfaces that make sense to users and work smoothly with backend systems. Certified in AI design and accessibility, I craft ethical, inclusive, and highly functional tools. Currently seeking remote EU opportunities or on-site roles in Rome, bringing a proven track record of helping businesses improve usability, automate workflows, and secure team buy-in through rapid, straightforward prototyping.

Core Competencies

- **UX Strategy & Architecture:** Object-Oriented UX (OOUX), Information Architecture, Lean UX Strategy, Wireframing & Rapid Prototyping.
- **Interaction & UI Design:** Design Systems (Figma), Mobile & Responsive Patterns, Touch Targets & Ergonomics, UI Component Libraries.
- **Research & Usability:** User Research & Personas, Usability Testing, WCAG Accessibility Compliance.
- **AI & Emerging Tech:** AI Interface Design & Ethical Configuration, AR

Patterns.

- **Process & Collaboration:** Agile Methodologies, Cross-functional Developer Handoff, Stakeholder Communication.

Professional Experience

Nagarro | User Experience and Interface Designer

May 2022 – Present

Worked as the lead designer on B2B and B2C enterprise software, focusing on accessible, well-structured interfaces and straightforward business outcomes.

- **Smart Buildings Software Restructuring:** Worked as the lead designer to reorganize a massive platform into a modular 'suites' concept, unlocking a new licensing model and improving navigation efficiency, with an estimated 30% reduction in time-on-task for core user workflows.
- **Accessibility & Core Infrastructure:** Designed core features for smart building software to ensure everything met strict WCAG accessibility standards. Overhauled the foundations (API, Workspace, Identity), data tables, service desks, and mobile views to guarantee compliance.
- **AI Integration:** Designed intuitive interfaces for two AI tools (an assistant and a copilot). Mapped out complex AI rules, setups, and data forecasting views so users could easily understand and control the AI outputs.
- **Workflow Automation (Financial Sector):** Worked as the lead designer on advanced interfaces for complicated financial back-office tasks. Automated routine steps in complex back-office operations to remove heavy manual administrative work, projected to reduce manual internal processing times by up to 40% per ticket.
- **Resource Tracking (Healthcare & Pharma):** Designed a warehouse management app that sped up the tracking and distribution of active medical agents, targeting a 15-20% decrease in user data-entry errors to minimize wasted materials globally. Created a specific package-update interface for lab hardware so technicians could install and remove software across testing

machines quickly and without errors.

- **Prototyping & Problem Solving (Consumer Hardware):** Used rapid click-through prototypes and demo videos to clarify generic error handling, accelerating project approval timelines by an estimated 2 to 3 weeks by bypassing heavy documentation phases.

Telios Care S.A. | UX, UI, and Visual Designer

January 2020 – May 2022

Worked as the lead designer on the end-to-end UX, UI, and visual design process to make telemedicine approachable and easy to use for patients, while supporting company growth.

- **Design Systems:** Built and maintained a core component library across patient and doctor portals, accelerating cross-platform design handoff times by an estimated 25%.
- **Web & Marketing Design:** Bridged the gap between product design and marketing by delivering responsive websites, landing pages, and digital campaigns.
- **Multimedia:** Created motion graphics and videos to explain complex health information simply and clearly for end-users.

Self-Employed | UX/UI Design Transition & Training

December 2019 – January 2020

- Dedicated a structured period to master user-centered design, interaction design, and usability through professional mentorship and intensive hands-on practice.

Simbound | Visual Designer

May 2019 – October 2019

- Created marketing materials, animations, and infographics to shape the brand's visual identity.
- Worked closely with the UX team to refine interface elements and built e-learning graphics that simplified complex digital concepts.

Previous Experience

- **Freelance Visual Designer & 3D Artist** (*Jan 2017 – May 2019*): Developed UI, 3D assets, and user flows for emerging brands and video games.
- **Customer Care Professional, Sykes Enterprises** (*Apr 2018 – Jan 2019*): Built strong communication, de-escalation, and problem-solving skills working directly with end-users.
- **Media/TV Visual Designer & Video Editor, NCN TV / Look TV** (*July 2014 – Apr 2017*): Handled motion graphics, editing, and visual pacing in a fast-paced broadcast environment.

Certifications

Interaction Design Foundation (IxDF)

- Agile Methods for UX Design
- User Research – Methods and Best Practices
- Object-Oriented UI Design: Build Interfaces Users Love
- Personas and User Research: Design Products and Services People Need and Want
- Design for Thought and Emotion
- Accessibility: How to Design for All
- Mobile UI Design
- AI for Designers

Education

- **Babeş-Bolyai University** | Bachelor's Degree, Cinematography and Film/Video Production (2012 – 2015)
- **Romul Ladea Plastic Arts High-School** | High School, Sculpture (2009 – 2012)
